

The mission of the American Lung Association of Oregon is to prevent lung disease and promote lung health.

In partnership with Care Medical Equipment, ALAO is working to help ensure Oregonians are able to properly manage their lung disease. Care Medical Equipment cleans, inspects, and stores the equipment until needed. A physician's order is required to receive donated equipment.

DONATE YOUR USED NEBULIZER

The American Lung Association of Oregon recognizes that lung disease disproportionately burdens certain populations - including individuals with limited finances.

Currently in Oregon, 79,461 children and 278,035 adults have asthma, 2,507 have lung cancer, and 177,926 are affected by COPD.

Often, individuals with lung diseases who lack or have limited health insurance have a difficult time covering the cost of nebulizers and other respiratory equipment needs.

In response, The Nebulizer Exchange Program was created to facilitate the exchange of nebulizers (and other durable medical equipment) from Oregonians who no longer need them to Oregonians who would have financial difficulty otherwise receiving them.

WANT TO DONATE?

Picture provided by Medical Supplies & Equipment Company.

Equipment Drop-Off:

American Lung Association of Oregon

**7420 SW Bridgeport Rd #200
Tigard, OR 97224**
